DATA LOSS PREVENTION

The Data Loss Prevention package adds deep, file-based data loss prevention capabilities

[Contact Us](#)

	CORE Package	Malware Defense	Data Loss Prevention
Complete web & internet content filtering	+	+	+
Stream-based & deep file-based protection including all ports and protocols (TCP & UDP)	+	+	+
Granular category and user-based web filtering Granular category and user-based web filtering	+	+	+
Trigger-based alerts Trigger-based alerts on keywords and events in real-time	+	+	+
File extension, domain extension, and content MIME type blocking	+	+	+
Port access management	+	+	+
Policy inheritance and combinatorial rule-sets Transition complex polices to the cloud	+	+	+
Advanced Policy Layers Layer policies on top of dynamically assigned policies	+	+	+
Dynamic real-time URL databases and feeds	+	+	+
SOCKS proxy support SOCKS proxy support in the cloud	+	+	+
Compliant with industry regulations	+	+	+
HIPAA certified with BAA HIPAA certified with Business Associates Agreement (BAA)	+	+	+

	CORE Package	Malware Defense	Data Loss Prevention
Meet financial regulations for web based messaging Control messaging and chat	+	+	+
CIPA compliant content filtering For education	+	+	+
SSL traffic management	+	+	+
Infinite SSL Inspection and Decryption in the cloud Leverage the cloud to perform SSL decryption at scale	+	+	+
Selectively decrypt based on content, device, user, or group	+	+	+
Cloud application and social media controls	+	+	+
CASB controls for applications, like G-Suite, Facebook, Twitter, LinkedIn, and Pinterest CASB controls for data in motion to prevent unsanctioned application use	+	+	+
Advanced application scanning and deep packet inspection (DPI)	+	+	+
Granular control over evasive cloud applications, like TOR, BitTorrent, SnapChat, Skype, and more	+	+	+
Safe Search Enforcement for Google, Bing, and Yahoo	+	+	+
Clean Image Search and Translation Filtering for Google Services	+	+	+
Mobile device protection	+	+	+
Complete content filtering for iOS, Android, and Chromebook devices	+	+	+

	CORE Package	Malware Defense	Data Loss Prevention
BYOD & guest Wi-Fi policy management	+	+	+
EOL Browser and OS protection	+	+	+
Browser end-of-life (EOL) protection	+	+	+
Operating system end-of-life (EOL) protection	+	+	+
Advanced, real-time reporting	+	+	+
Reporting visibility regardless of user location Follow the user security strategy in the cloud	+	+	+
Comprehensive, log and drill-down reports	+	+	+
Live, historical, and statistical reports	+	+	+
Report scheduling and customization	+	+	+
Instantly pinpoint and lock users attempting to circumvent security via evasive protocols	+	+	+
Log event searching	+	+	+
Native Splunk integration	+	+	+
SIEM integration for forensic-level reporting	+	+	+
Centralized management and administration in the cloud	+	+	+

	CORE Package	Malware Defense	Data Loss Prevention
Cloud admin console with responsive web UI	+	+	+
Complete, unified policy management in the cloud	+	+	+
Seamless directory integration and group management	+	+	+
System-delegated administrators and reporting groups	+	+	+
Location-based policies	+	+	+
Custom branding on end-user sign-in and block pages	+	+	+
Flexible cloud security connectors for Internet security regardless of location	+	+	+
Protection for Windows, Mac, iOS, Android, Chromebook, and Linux devices Protection in and out of the organization's network perimeter	+	+	+
Malware prevention & breach detection	-	+	+
Malware identification and mitigation from best-of-breed malware databases	-	+	+
Up-to-the-minute threat information with synchronous database updates	-	+	+
Command and Control (CnC) callback detection	-	+	+
Domain, URL, and blacklisted IP monitoring	-	+	+
Geolocation for callback origin identification	-	+	+

	CORE Package	Malware Defense	Data Loss Prevention
Behavioral Malware Sandboxing Defense	-	+	+
Real-time auto-deposit of user downloaded files using signatures generated from behavioral sandboxing analysis	-	+	+
Blended AV scanning	-	+	+
Global cloud threat intelligence protection	-	+	+
Crowd-sourced threat intelligence for signatures and samples	-	+	+
Malware origin and behavior pattern investigation	-	+	+
Time-saving Incident Response Center	-	+	+
Real-time malware detection for prioritized response	-	+	+
Translation and prioritization of security event logs into incidents, reducing noise	-	+	+
Actionable to-do list for remediation and auditing of top security incidents	-	+	+
High risk/infected user and device identification	-	+	+
Deep forensic analysis to reduce false positives	-	+	+
Identification of IP aliases and malicious hosted files	-	+	+
Dwell time infection measurement	-	+	+
Snapshot of global historic outbreaks	-	+	+

	CORE Package	Malware Defense	Data Loss Prevention
Intrusion detection and prevention	-	+	+
Real-time intrusion, malware, and virus protection	-	+	+
Quickly and easily view event detail, including source and destination IP	-	+	+
Automatic and included threat feed subscriptions	-	+	+
Category-based malware rules	-	+	+
Visual IPS rule creation and editing	-	+	+
Deep file-based data loss prevention capabilities	-	-	+
Detect, alert, and stop the transfer of sensitive data to and from the cloud	-	-	+
Provides protection against unauthorized cloud use	-	-	+
Advanced sensitive content detection	-	-	+
Screen content to prevent unintended loss of sensitive information	-	-	+
Capable of scanning for Credit card numbers, email addresses, and other Personally Identifiable Information (PII)	-	-	+
Advanced Content Analysis Engines	-	-	+
Process and parse targeted files, ensuring that even compressed content is accessible to the detection engines	-	-	+

	CORE Package	Malware Defense	Data Loss Prevention
Set compressed file max scan depth to search for content deep within zip files	-	-	+
Analyzes numerous file types including PDF, Zip Files, and Outlook data files	-	-	+

Addons

Advanced API-Based CASB for Data at Rest

Extends CASB protection to data at rest within popular cloud applications including Amazon Web Services, Box, Cisco Webex, Dropbox, G Suite, Okta, Salesforce, ServiceNow and Workday. The iboss cloud will continuously monitor data within cloud applications to prevent data loss.

About iboss

iboss is a cloud security company that provides organizations and their employees secure access to the Internet on any device, from any location, in the cloud. This eliminates the need for traditional security appliances which are ineffective at protecting a cloud-first and mobile world. Leveraging a purpose-built cloud architecture, iboss is designed to make transitioning from security appliances to cloud security a seamless process. iboss is trusted by more than 4000 organizations worldwide, spans over 100 points of presence globally and is backed by over 110 patents.
