

For Partners

iboss Partner

Partner with iboss for Success

The shift to securing user Internet access in the cloud is underway as organizations leave behind perimeter-focused web gateway appliances. This is creating opportunities for partners to complement our offerings and share in our growth.

Networks are increasingly leveraging cloud applications delivered as a service. SaaS allows businesses to consume applications quickly and easily, enabling them to become more productive and competitive while also enabling mobility, as employees can work from anywhere while leveraging critical business applications such as Office 365.

The shift to the cloud requires fast and secure Internet connections from anywhere. The iboss cloud secures Internet access on any device, from any location, in the cloud. The foundation of switching to the cloud is the ability to secure connectivity with scalability to support infinite bandwidth and connections. Since iboss runs in the cloud, it can scale to any capacity instantly, removing the restrictions and limited performance of on-prem appliances.

We're committed to our partners and dedicated to your success – with the technology, tools, and support to help you increase market share through new opportunities, and achieve incremental revenue growth within existing customers.

Key Reasons to Become an iboss Partner

Innovative technology

Cloud based Internet security with immediate ROI, easy migration from legacy appliances, and on-demand scalability.

100% Cloud. 100% Subscription

The iboss cloud is sold as a 100% SaaS subscription, and can be deployed within minutes -- that means there's no hardware to buy and manage.

Global Sales and Support Engineers

Global sales and support engineers help you with the technical assistance to close deals quickly.

Fast Deployment in the Cloud

The iboss cloud leverages the cloud to seamlessly protect users wherever they roam.

Strong Marketing Support

We're here to back you up with a full array of programs and tools to foster fast revenue growth.

For MSPs

iboss MSP

Scale your MSP offering by leveraging iboss to secure Internet access in the cloud, eliminating the need for network security appliances.

Buy Now

The iboss cloud can secure user Internet access on any device, from any location, in the cloud. Best of all, you can start using it immediately to protect your users instantly.

What you get

- In the cloud Internet security
