This chart provides a comprehensive overview of the iboss FWaaS E-Rate Eligible - Zero Trust Edge features that are available in the Zero Trust Core, Advanced and Complete packages.

iboss FWaaS E-Rate Platform Features	Zero Trust Core	Zero Trust Advanced	Zero Trust Complete
iboss E-Rate Eligibility	98%	92%	92%
Core Capabilities -- Zero Trust Edge Service			
Unified Zero Trust Service Edge	•	•	•
Zero Trust Resource Access Policies - Implement the NIST 800-207 Zero Trust Access Model	•	•	•
Resource Catalog - including Apps, Data and Services	•	•	•
User Catalog	•	•	•
Asset Catalog	•	•	•
Resource Tagging by Type and Location	•	•	•
Resource Risk Level Classification	•	•	•
Zero Trust NIST 800-207 Criteria-Based Access Policies	•	•	•
Cloud Connector Agents for Windows, Mac, iOS, Chromebooks, Linux and Android	•	•	•
User and Group Based Access Policies via Cloud Connectors	•	•	•
Connect Cloud Accessible Resources to Zero Trust Edge	•	•	•
Encrypted Traffic Inspection and Protection (HTTPS Decrypt)	•	•	•
Cloud Security Controls	•	•	•
Proxy Combinatorial Rules & Actions - Block, Allow, Redirect	•	•	•
Policy Tracing for troubleshooting policies	•	•	•
Reporting - including Real-Time Dashboards, Drill Down Reports, Reporting Templates	•	•	•
Identity & Authentication Integration			
SAML & OIDC Identity Provider (IdP) Integration (Sync User & Group Identity to Microsoft, Okta, Ping, etc.)	Add-on	•	•
Extend Modern Authentication (SAML/OIDC) to Legacy Apps & Resources	Add-on	•	•
Log Forwarding			
Log Forwarding to SIEM - Syslog, SCP, SFTP	Add-on	•	•
Microsoft Sentinel Log Forwarding Integration	Add-on	•	•
Splunk Log Forwarding Integration	Add-on	•	•
Trust Scoring			
Zero Trust NIST 800-207 Score-Based Access Policies	Add-on	•	•
Zero Trust Scoring Algorithms - Including Asset Posture Checks	Add-on	•	•
Zero Trust Score-Based Reporting - By Resource Type, Resource Location, Security Objective and Security Impact Level	Add-on	•	•
Private Network Resource			
Connect Resources on Private Networks (via Tunnels, SD-WAN, WCCP) to Zero Trust Edge	Add-on	•	•
Posture Checks			
Asset and Device Posture Checks	Add-on	•	•
Malware Prevention			
Malware Prevention	Add-on	•	•
Infected Device Detection and Isolation (CnC Callback Prevention)	Add-on	•	•
Phishing Prevention	Add-on	•	•
Prevent Malicious Sources	Add-on	•	•
Threat Dashboards - including prevented malware, phishing, malicious sources	Add-on	•	•
DNS Security	Add-on	•	•
User and Asset Incident Dashboards - including infected devices and users with active incidents	Add-on	•	•
Malware Sandboxing			
Malware Sandboxing	Add-on	•	•
Inline CASB			
Realtime Inline CASB	Add-on	•	•
API CASB			
Out-of-Band API CASB	Add-on	Add-on	•
DLP			
Inline Data Loss Prevention (PII, CCN)	Add-on	Add-on	•
Microsoft Direct Integration			
Microsoft Cloud App Security Integration (MCAS)	Add-on	•	•
Microsoft Authentication Context (Conditional Access) Integration	Add-on	•	•
Exact Data Match DLP			
	Add-on	Add-on	Add-on

Browser Isolation (VDI Replacement)	Add-on	Add-on	Add-on
Add on's			
Web Filtering			
iboss Identity Provider Add-On			
iboss Trust Scoring Add-On			
iboss Private Network Resource Add-On			
iboss Malware Prevention Add-On			
iboss Malware Sandboxing Add-On			
iboss Inline CASB Add-On			
iboss API CASB Add-On			
iboss DLP Add-On			
iboss Log Forwarding Add-On			
iboss Microsoft Integration Add-On			
iboss Exact Data Match Add-On			
iboss Browser Isolation Add-On
